## **INTRODUCTION**

Hennepin Health's closed formulary includes a list of drugs that are covered by Hennepin Health. Providers prescribing drugs to members who are covered by one of my Hennepin Health's plans should refer to this formulary.

The drugs listed in this formulary have been reviewed and approved by the Hennepin Health Pharmacy and Therapeutics Committee (P&T). The drugs selected for this formulary are clinically appropriate and cost-effective for members who have their drug benefits administered through Hennepin Health. There may be occasions when an unlisted drug is desired for the medical management of a specific member. In those instances, the unlisted medication may be requested by submitting a Prior Authorization Form (Minnesota Uniform Formulary Exception Form) that is available online at [www.hennepinhealth.org](http://www.hennepinhealth.org).

The information contained in the Hennepin Health closed formulary and its appendices is provided by Hennepin Health for the convenience of members and providers. Hennepin Health neither warrants nor ensures the accuracy of such information. The formulary is not intended to be comprehensive in nature, or to serve as a substitute for the knowledge, expertise, skill or judgement of medical providers in their choice of prescription drugs. All of the information in the formulary is provided as a reference for the drug therapy selection. Specific drug selection for an individual member rests solely with the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

Hennepin Health neither assumes responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

Hennepin Health requires generic/brand copays in some groups with a monthly out-of-pocket expense maximum. Select populations, including, but not limited to children less than the age of 21, pregnant women, hospice and nursing homes are exempt from copays. Additionally, all anti-psychotic drugs are exempt from copays. Members may have copays if they have Medicare Part D coverage with another plan.

Hennepin Health contracts with Navitus Health Solutions™ as its pharmacy benefit manager (PBM). Claims are processed through the Navitus Health Solutions system.

## **PREFACE**

The Hennepin Health closed formulary is organized into two sections: first, alphabetically, and second, by therapeutic classification. Brand name drugs are printed in all capital letters, and generic drugs are listed in all lower case letters. Unless exceptions are noted, generally, all applicable dosage forms and strengths of the drug cited are included. Generics should be considered the first line of prescribing, subject to applicable rules. The formulary also covers selected over-the-counter (OTC) products. Providers are encouraged to prescribe them when appropriate. Some OTCs are noted within the drug lists; a reference list is included in the preface.

## **PHARMACY NETWORK**

Covered products, including drugs that have been approved as a non-formulary exception, must be purchased through a network pharmacy in order to be covered through this benefit. The pharmacy network is managed and maintained through Navitus Health Solutions. For assistance with locating a

network pharmacy, members and providers can call the Navitus call center at 1-855-673-6504 or visit [www.hennepinhealth.org](http://www.hennepinhealth.org).

## **PRODUCT SELECTION CRITERIA**

The Hennepin Health P&T Committee will consider United States Food and Drug Administration (FDA) approved drugs for inclusion in the formulary. The evaluation includes a literature review and expert opinion may also be sought. Formal reviews are prepared, which typically address the following information:

- Safety
- Comparison studies of cost and efficacy
- Approved indications
- Adverse effects
- Contraindications/warnings/precautions
- Pharmacokinetics
- Patient administration/compliance considerations
- Medical outcome and pharmacoeconomic studies

When a new drug is considered for formulary inclusion, an attempt will be made to examine the drug relative to similar drugs currently in the formulary. In addition, entire therapeutic classes are periodically reviewed. The class review process may result in deletion of one or more drug(s) in a particular therapeutic class in an effort to continually promote the most clinically useful and cost-effective agents.

*All of the information in the Hennepin Health closed formulary is provided as a reference for drug therapy selection. Specific drug selection for an individual rests solely with the prescriber.*

## **GENERIC SUBSTITUTION**

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the FDA for safety and effectiveness and manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug. Generics may be different from the brand in size, color and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.

## **NON-FORMULARY DRUG REQUEST (MEDICAL EXCEPTION)**

If a prescription drug is not listed in the Hennepin Health formulary, it is considered non-formulary. If changing to a formulary medication is *not* medically advisable for a member or situations arise in which it is *medically* necessary that a non-formulary medication be used, the unlisted medication may be requested through the Hennepin Health non-formulary drug request process. The prescriber can call 1-800-647-0550 to notify Hennepin Health of the desire for a non-formulary medication.

Members can complete the Minnesota Uniform Formulary Exception Form located on [www.hennepinhealth.org](http://www.hennepinhealth.org). The completed form will be reviewed by Hennepin Health for consideration. If a member has been receiving the prescribed non-formulary drug at the time of the request, a 30-day supply will be covered during the review process. The member and prescriber will be notified of the decision.

## **PRIOR AUTHORIZATION**

Hennepin Health requires prior authorization (PA) for certain drugs. The PA requirement is noted in the text with a “PA” after the drug name. Additions and deletions to the drugs requiring PA can also be found on [www.hennepinhealth.org](http://www.hennepinhealth.org). Drugs requiring PA are not covered unless the request for PA is approved. To request PA, the prescriber should complete the PA form located on [www.hennepinhealth.org](http://www.hennepinhealth.org) and fax it to Hennepin Health at 612-321-3712. A representative will contact the prescriber if other information is needed. If approved, Navitus Health Solutions will change the online computer to allow the member to obtain the drug. If the request is not approved, a letter to the member and prescriber will state the reasons why and provide the grievance/appeals process. The criteria for use of each drug follows the FDA-approved labeled indications and standards of medical practice. These criteria can change based on newly approved indications.

## **QUANTITY LIMITATIONS**

Quantity Limitations (QL) provide for a maximum quantity of drug product that a member may receive per prescription over a specific period of time.

## **EXCLUDED DRUGS**

Hennepin Health excludes the following drugs including, but not limited to these conditions:

- Anorexia, weight loss or weight gain (e.g., Alli)
- Treatment of sexual or erectile dysfunction (e.g., Viagra, Cialis)
- Promote hair growth for cosmetic purposes
- Promethazine with codeine

## **SPECIALTY DRUGS**

Drugs with the designation of Mandatory Specialty Pharmacy Program (MSP) are required to be filled through a specialty network pharmacy. Drugs with a designation of Limited Distribution (LD) are often only available through a single supplier. Any drug with the indication of Specialty (SP) can be dispensed at any network pharmacy.

## **OVER-THE-COUNTER DRUGS**

Drugs and products that are available for purchase without a prescription are designated as OTC by the FDA. In order to obtain a covered OTC item under this benefit, a prescription is required.

### **COVERED OVER-THE-COUNTER DRUGS**

*Note: This is not an all-inclusive list.*

#### **Category**

#### **Antacids**

alumina/magnesia: susp

#### **Brand Name Examples**

**Category**

alumina/magnesia/simethicone: chew tabs, susp

**EDITOR**

Your comments and suggestions regarding the Hennepin Health closed formulary are encouraged. All responses will be reviewed and considered. Please send your comments to:

Hennepin Health  
Pharmacy Department  
Grain Exchange Building  
400 South Fourth Street, Suite 201  
Minneapolis, MN 55415

**SPECIALTY PLAN DESIGN**

Specialty Program Management (SPM) is a utilization management program that helps ensure appropriate utilization for specialty medication based on currently accepted evidence-based medicine guidelines. The utilization management program is available for all therapeutic areas dispensed by specialty pharmacies. SPM is designed to help ensure safety and efficacy while preventing off-guideline utilization. Medications that may be included in the SPM program are identified in the document as “SP” for reference.

**PLAN DESIGN**

The document represents a closed formulary plan design. The medications listed in the document are covered by the plan as represented when dispensed through a network pharmacy. Certain medications on the list are covered if utilization management criteria are met (e.g., step therapy, prior authorization, quantity limits, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

**NOTICE**

The information contained in this document is proprietary. The information may not be copied in whole or in part without written permission. ©2019. All rights reserved.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers not affiliated with Hennepin Health.

When viewing the Hennepin Health closed formulary online, please be advised that it is updated periodically and changes may appear prior to their effective date to allow for member notification.

**Search Tip:**

This is a large document, but you can search quickly and easily by clicking on the binocular icon on your toolbar. It will then display a search box for you to type in the name of the drug you want to locate. If you do not know the correct spelling, you can start your search by entering just the first few letters of the name.
